SECURITY TEST PRIVACY POLICY

SAFE, INERT TEST FIXTURE - NOT REAL MALWARE

This document contains deliberately false policy data and suspicious-looking text.
Its purpose is to test upload validation, extraction, WAF rules, and safe rendering.

XSS TEST STRINGS - these must be displayed as text and must never execute:
<script>alert("XSS_TEST_SCRIPT")</script>
<img src="invalid" onerror="alert('XSS_TEST_IMAGE')">
Open policy
Privacy settings

NON-DESTRUCTIVE SQL INJECTION TEST STRINGS - these must remain plain text:
Company: Example' OR '1'='1
Reference: 1 UNION SELECT 'SQL_TEST', NULL --
User: admin' --
Policy ID: 1; SELECT 'SQL_TEST_ONLY'; --

BOGUS POLICY CONTENT:
We collect every type of personal information forever, including location, contacts, messages, financial records and browsing history. We may sell this information to imaginary companies without consent. Users cannot access, correct or delete it.

EXPECTED SAFE RESULT:
No alert appears. No SQL runs. The content is rendered only as text, or the upload is rejected with a clear security message. Test only on a system you own or are authorised to test.
